

Retro taste mixed with a futuristic style

Retrofuture is the handtuft collection designed by Architect and Art Director Graziana Calabrese.

This extraordinary line of carpets challenges temporal conventions with a skillful combination of retro elements and a bold vision of the future seen through a multidisciplinary lens. Retrofuture blends technology and futuristic themes with retro design, creating a unique visual aesthetic that challenges traditional norms. This results in a fusion of styles that gives birth to a unique product, celebrating the union of different cultures.

Retrofuture creates an original and unique pattern by combining different textile techniques. The contrasting materials produce a stunning game of light and dark, making colors move in a vibrant fashion.

Embossing, Loop, Carving and V-Shape are among the masterfully and skillfully applied artisanal techniques that have always set apart Luxury Carpet Studio products.

Retrofuture ultimately represents a bold and compelling interpretation of the new frontiers of textile design that can be reached by reimagining the concepts of luxury and innovation.

Retrofuture
celebrates all aspects
of beauty and life.

Collection

The concept of the Retrofuture collection is born from a ground-breaking idea: mixing the soft shapes of the retro style and pastel colors while adding a future-oriented contemporary touch. This peculiar combination transforms classic patterns into stylized shapes with bright details that give life and energy.

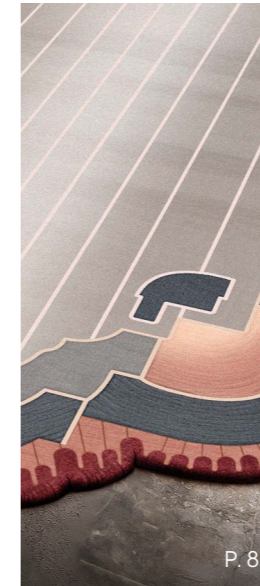

The distinctive elements of the collection include the shaping of edges that provides greater character and sophistication to the carpet while gently framing it within the rooms it inhabits.

Every piece is more than a simple decoration, it becomes a precious protagonist that gives life and personality to each environment.

Googie

Futuristic labyrinth

The Googie carpet boldly opens the Retrofuture collection by transcending traditional geometric shapes. A strong personality provided by its irregular and molded shape, the chromatic contrast, the presence of different yarns that interact with glossy and matte parts and finally a floral theme that provides a retro feel at the heart of a futuristic labyrinth.

Dynamic symmetry

Dynamic and flippant, a combination of interconnected shapes and the strictness of straight lines. The soft and rounded border frames a degradè soul with visibly grooved vertical lines. This harmonious and contemporary composition is characterized by parallel straight lines and games of symmetry.

Firebird

Feathers of elegance

A feminine and elegant look dominated by blue, orange and crimson, its feathers are reminiscent of the auspicious Firebird, a majestic and mythological bird. The dégradé flower gives a romantic touch and its long, looped pistils propel it towards infinity.

Bamboo - Wool
176 x 300 cm
Totally customizable

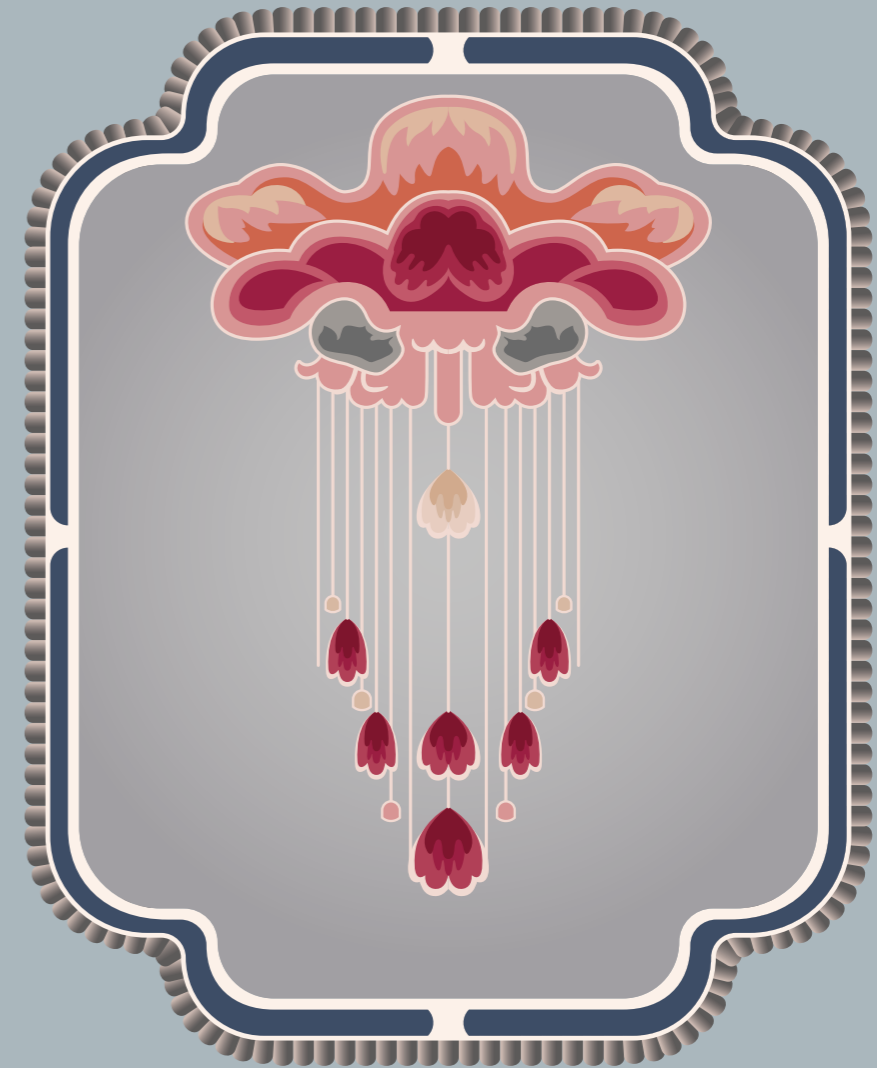

Novanoah

A blossoming vision

A large, stylized flower at the center of a futuristic object akin to something retro with sinuous shapes and warm colors. The natural element at the heart of Novanoah resides within a curved and shaped frame, that transports us to a magical and imaginary world where nature and reality transform to create a new vision.
